

Amendments to the Specification

At page 8, lines 14-19, is amended as follows:

The opening/bending objects are all adjustable, thus enabling the same reservoir to be utilized for multiple hose assemblies 10. The opening/ending objects are adjustable in both vertical [[or]] and horizontal directions such that they create the proper bend in the hose assembly 10 to efficiently and effectively allow for the disbursement material to enter the crevices of the hose assembly 10.
